SUMMARY

CSE student with hands-on experience building distributed systems, microservices, and scalable backends. Contributor to large-scale open-source projects (Chromium, D). Proficient in TypeScript, C++, Rust.

PROJECTS

- Weezy: Workflow Orchestration System** (*TypeScript, GraphQL, BullMQ, Redis, PostgreSQL*) Github
- Architected a **DAG-based distributed workflow engine** with deterministic execution using BullMQ + Redis, supporting **horizontal scalability** across concurrent workers.
 - Built **GraphQL API** over PostgreSQL via Prisma for real-time workflow monitoring and distributed user activity tracking.
 - Designed modular node architecture with clean separation between orchestration and execution layers, enabling extensible third-party integrations.
- Ratelimiter** (*Rust, Actix-web*) Github
- Built a **trait-based, pluggable rate limiting service** in Rust (Actix-web) implementing 5 algorithms — Token Bucket, Leaky Bucket, Fixed Window, Sliding Window Log, and Sliding Window Counter — behind a unified RateLimiter trait.
 - Benchmarked **100k requests** across all algorithms with simulated burst traffic; achieved **sub-130ms** total runtime with Mutex-guarded shared state for thread-safe concurrent access.

EXPERIENCE

- Open Source Contributor – Chromium** (C++, TypeScript, Java, CSS)
- Refactored Android install flow by extracting WebAPK, Add-to-Homescreen, and Universal Install handling from ChromeActivity into a new AppInstallMenuHandler module improving modularity and maintainability. CL #7458172
 - Replaced deprecated base::Time sentinel with base::Time::Max() for clearer and safer time-range handling. CL #7206813
 - Improved unreadable console output selection text color in DevTools by enhancing selection contrast for dark backgrounds. CL #7109459
- Open Source Contributor – DUB (D Package Manager)** (D)
- Auto-create missing workingDirectory before dub run execution. PR #3097
 - Fixed VisualD generator to use the selected compiler instead of hardcoded dmd. PR #3094
 - Corrected ReaderException to report actual YAML line and column. PR #3100

ACHIEVEMENTS

- Solved **500+** problems on LeetCode across various topics.
- Knight at LeetCode with contest rating of **1950+**.

TECHNICAL SKILLS

- **Languages:** C++, Rust, Go, TypeScript, Python, C, D, Java, Bash
- **Frameworks and Libraries:** React.js, React Native, Next.js, SvelteKit, Express.js, Gin, FastAPI
- **Databases and ORMs:** PostgreSQL, MongoDB, Redis, SQLite, Prisma, Drizzle
- **Tools:** Linux, Docker, Kubernetes, Git, AWS, GCP
- **Concepts:** Distributed Systems, Concurrency, Multi-threading, System Design, CI/CD, OOP, Agile/Scrum

EDUCATION

CV Raman Global University

Bachelor of Technology in Computer Science and Engineering

Bhubaneswar, India

(2023 – 2027) — CGPA: 8.64
